

STARSHADE

KREKELS STARSHADE

Step 1: Check if you have the following parts

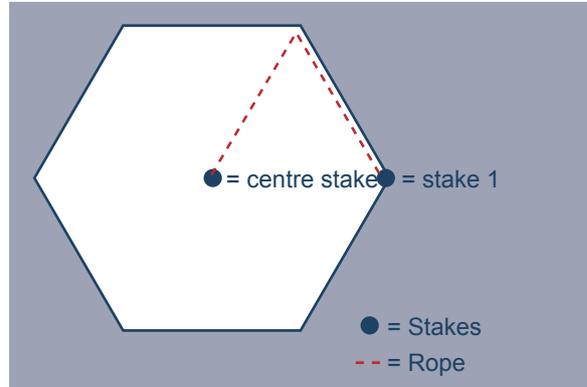

Cover

Pole

Carrybag with 6 stakes , measuring rope,
jack handle , centre pin

Stake puller

Hammer

Step 2 : Measuring

a. Choose a central point (picture 1-2)

b. Measure the position of the first foot with the measuring rope (picture 2)

c. Measure with the rope the position of the other 5 feet (picture 2-3)

Tip: Move each stake 5-10 cm to the centre pin.

This will lower the tension when you put up the tent.

Step 3:

Hit all the stakes in the ground. (picture 4)

Step 4:

Place a protective ground foil at one side of the centre pin. (picture 5)

Step 5:

Open up the tent with the top away from the centre pin. Attach the 2 feet that are the closest to the top on their stake (1 left off the top and 1 right).

Place the other feet into the direction of their stake. (picture 6)

Step 6:

Place the pole under the tent.

Tip: 1 person at the front and 1 at the back of the pole.

Person 1 makes sure that the pole is well placed in the ring of the top.

Person 2 places the end of the pole behind the centre pin. (picture 7-10)

Step 7:

Pull the tent up : Person 1 pushes the pole above his head, person 2 helps pulling and walks backwards until he reaches the stake of the foot. (picture 11-12)

Step 8:

Use the jack handle to lift the pole. (picture 13)

STARSHADE

KREKELS STARSHADE: Pictures

KREKELS STARSHADE: Breaking down the tent

- Put the protective ground foil at one side of the centre pin.
- Lower the pole by using the jack handle.
- 2 persons take each 1 foot, walk to the centre , the tent will smoothly fall down.
- Remove the pole from under the tent.
- Put all the feet next to each other.
- Roll up the tent from the top to the feet.
